Automation

Expert Consultancy  
and Support

### We can help if:

- You want to automate complex processes involving human decisions
- You have lots of people doing repetitive work in multiple systems - including legacy systems that are hard to access
- You are unhappy with, or would like to enhance your RPA or automation system
- You have been told by another provider that your process can't be fully automated

“

Other suppliers said our problem was too complex or hard to fix – your innovation and vision have really helped us to move forward with our operational challenges - David Patterson

## More Than Just a Tool

We took 15 years experience developing bespoke software systems for back-end processes in banking and financial services and used it to build the automation tool we knew our customers really needed. Our mission was to put the power back in our customer's hands, but we have retained our service focus to provide all the help and guidance needed to ensure success on your automation journey.

## True End-to-End Process Automation

SmartFlow has won multiple awards as it is able to automate more complex processes than traditional RPA tools. It handles real world processes and data using advanced technologies.

### Automated Intelligent Decision Making

Using AI and advanced data understanding

### Human-In-The Loop

Use AI to speed up and better inform human decision making

### Works With Your Documents and Systems

Advanced OCR and unstructured data handling

### FCA Compliant Audit Trail

Automatically produced as processes run

### Bank-Level Security

Built with security in mind - on site or in the cloud
